

## Texstars, Inc. Announces Major Program Award

November 30, 2008 – Texstars, Inc., Grand Prairie, Texas

Texstars, Inc., a division of Hampson Industries PLC, is pleased to announce the signing of an initial agreement with CPI Aero for the production of wing components for Gulfstream's newest business jet, the G650. The G650, Gulfstream flagship aircraft, is the largest and fastest of the aircraft that they produce. Deliveries for this contract are expected to begin in early 2009.

David Foster, Texstars' Sales and Marketing Manager, commented, "We are very excited about the opportunity to team with CPI Aero in the support of their efforts on the G650. CPI is a very skilled integrator with experience on multiple platforms and we are pleased that they have chosen Texstars as their partner on this exciting new program."

Texstars is engaged in the development and production of highly engineered thermo-plastic and composite solutions for the aerospace and defense marketplace. Additionally, Texstars is a leader in the manufacture of aircraft transparencies and transparent armor solutions. Texstars has a variety of capabilities that include blow/injection molding, vacuum forming, composite bonding, and VARTM. Texstars customers' include leading prime aerospace and defense contractors, the U.S. Government, aircraft OEMs and mass transit OEMs.

The above statements may include forward looking statements that involve risks and uncertainties.
